

Multi-Vendor E-Commerce Platform

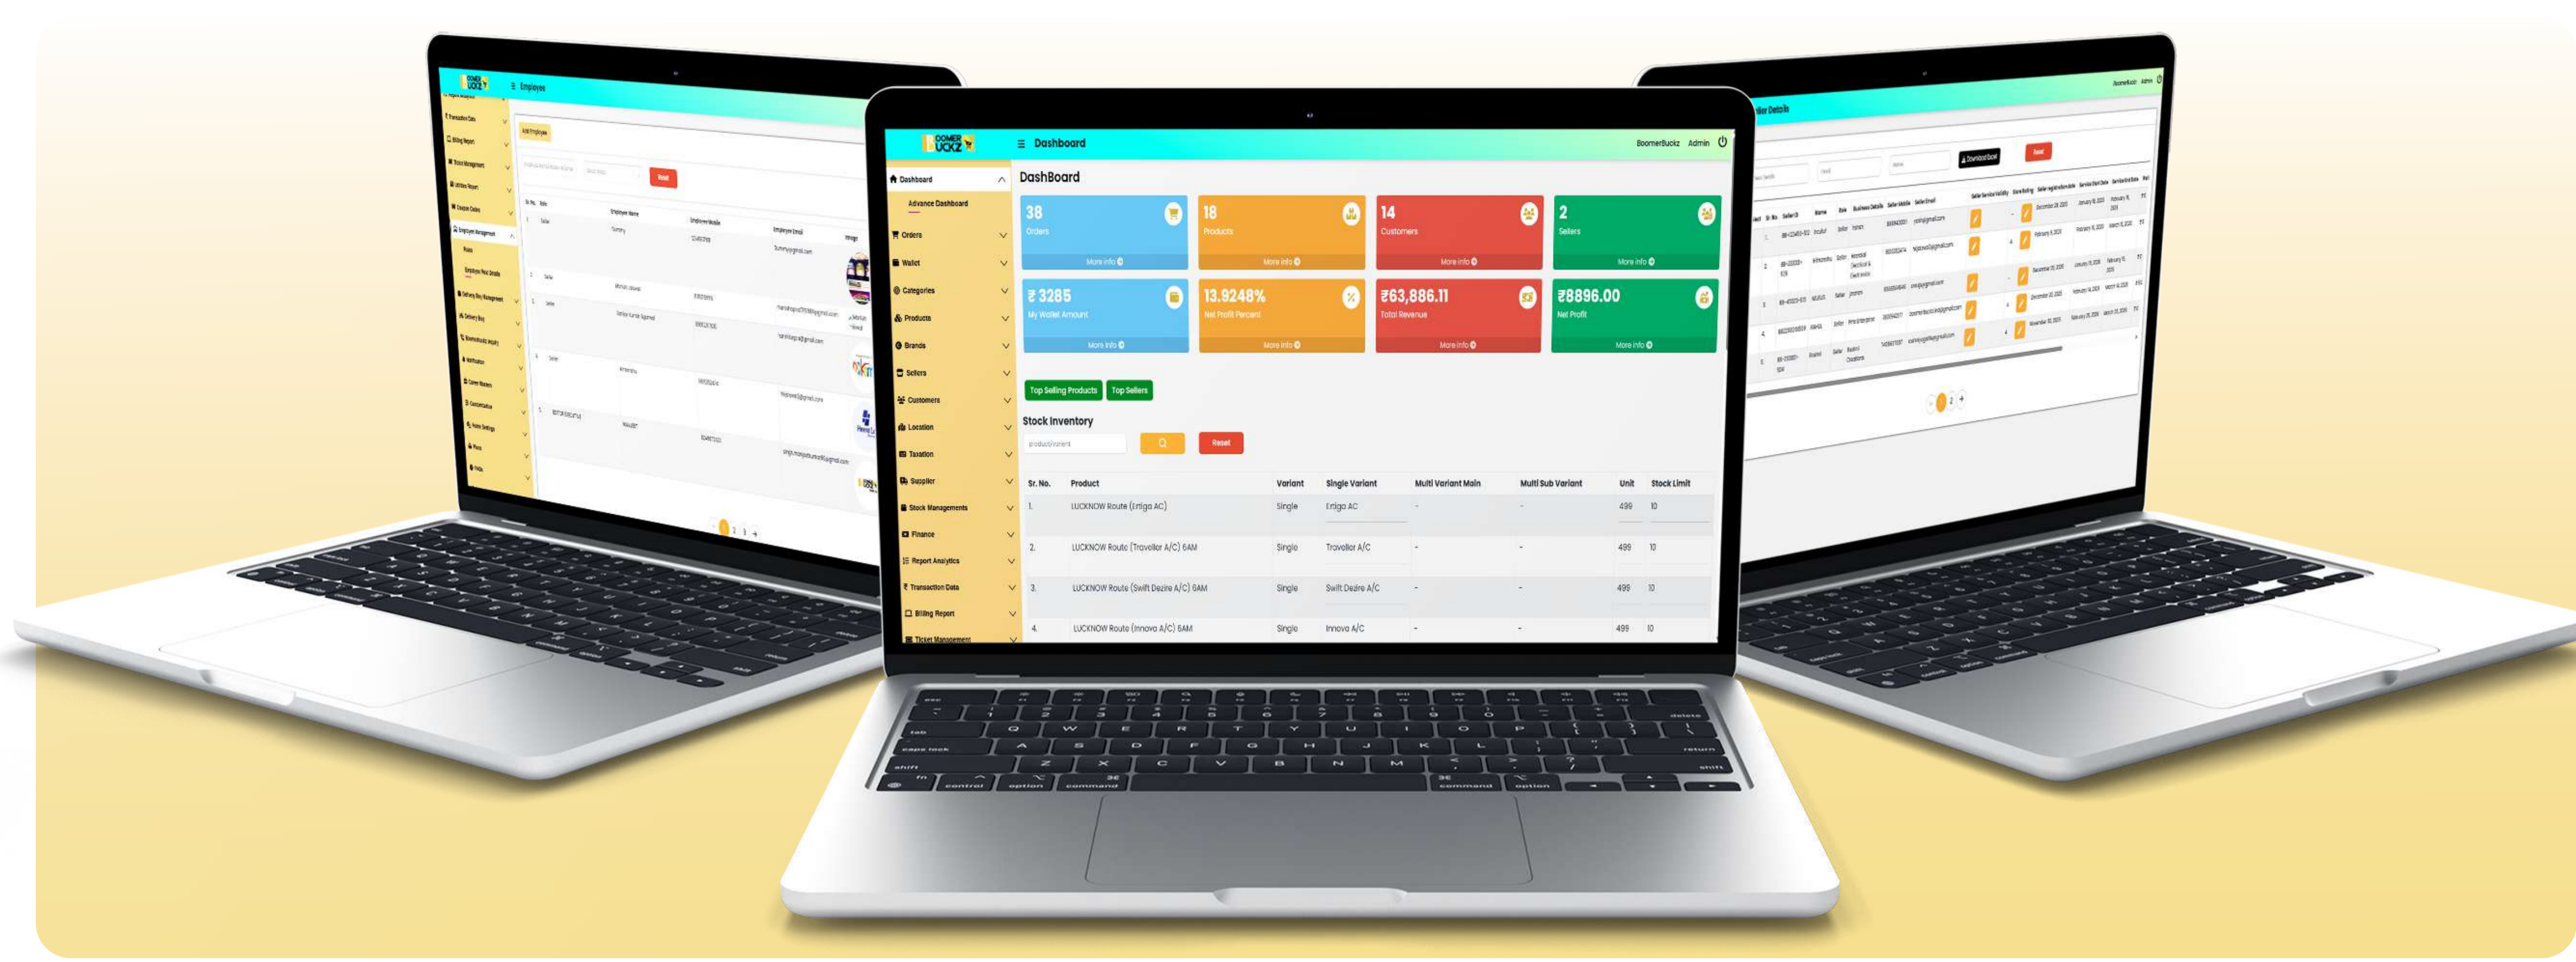

Industry:
Online Retail & Digital Marketplace

- Services Provided:**
- E-Commerce Website Development
 - Customer Mobile Application (APK)
 - Seller Mobile Application (APK)
 - Delivery Partner Application (APK)
 - Admin Panel & Seller Panel Development

PROJECT OVERVIEW

Boomer Buckz is a multi-vendor eCommerce platform designed to connect customers, sellers, and delivery partners within a unified digital marketplace. The platform enables sellers to list products, customers to browse and purchase items, and delivery partners to manage order fulfillment efficiently.

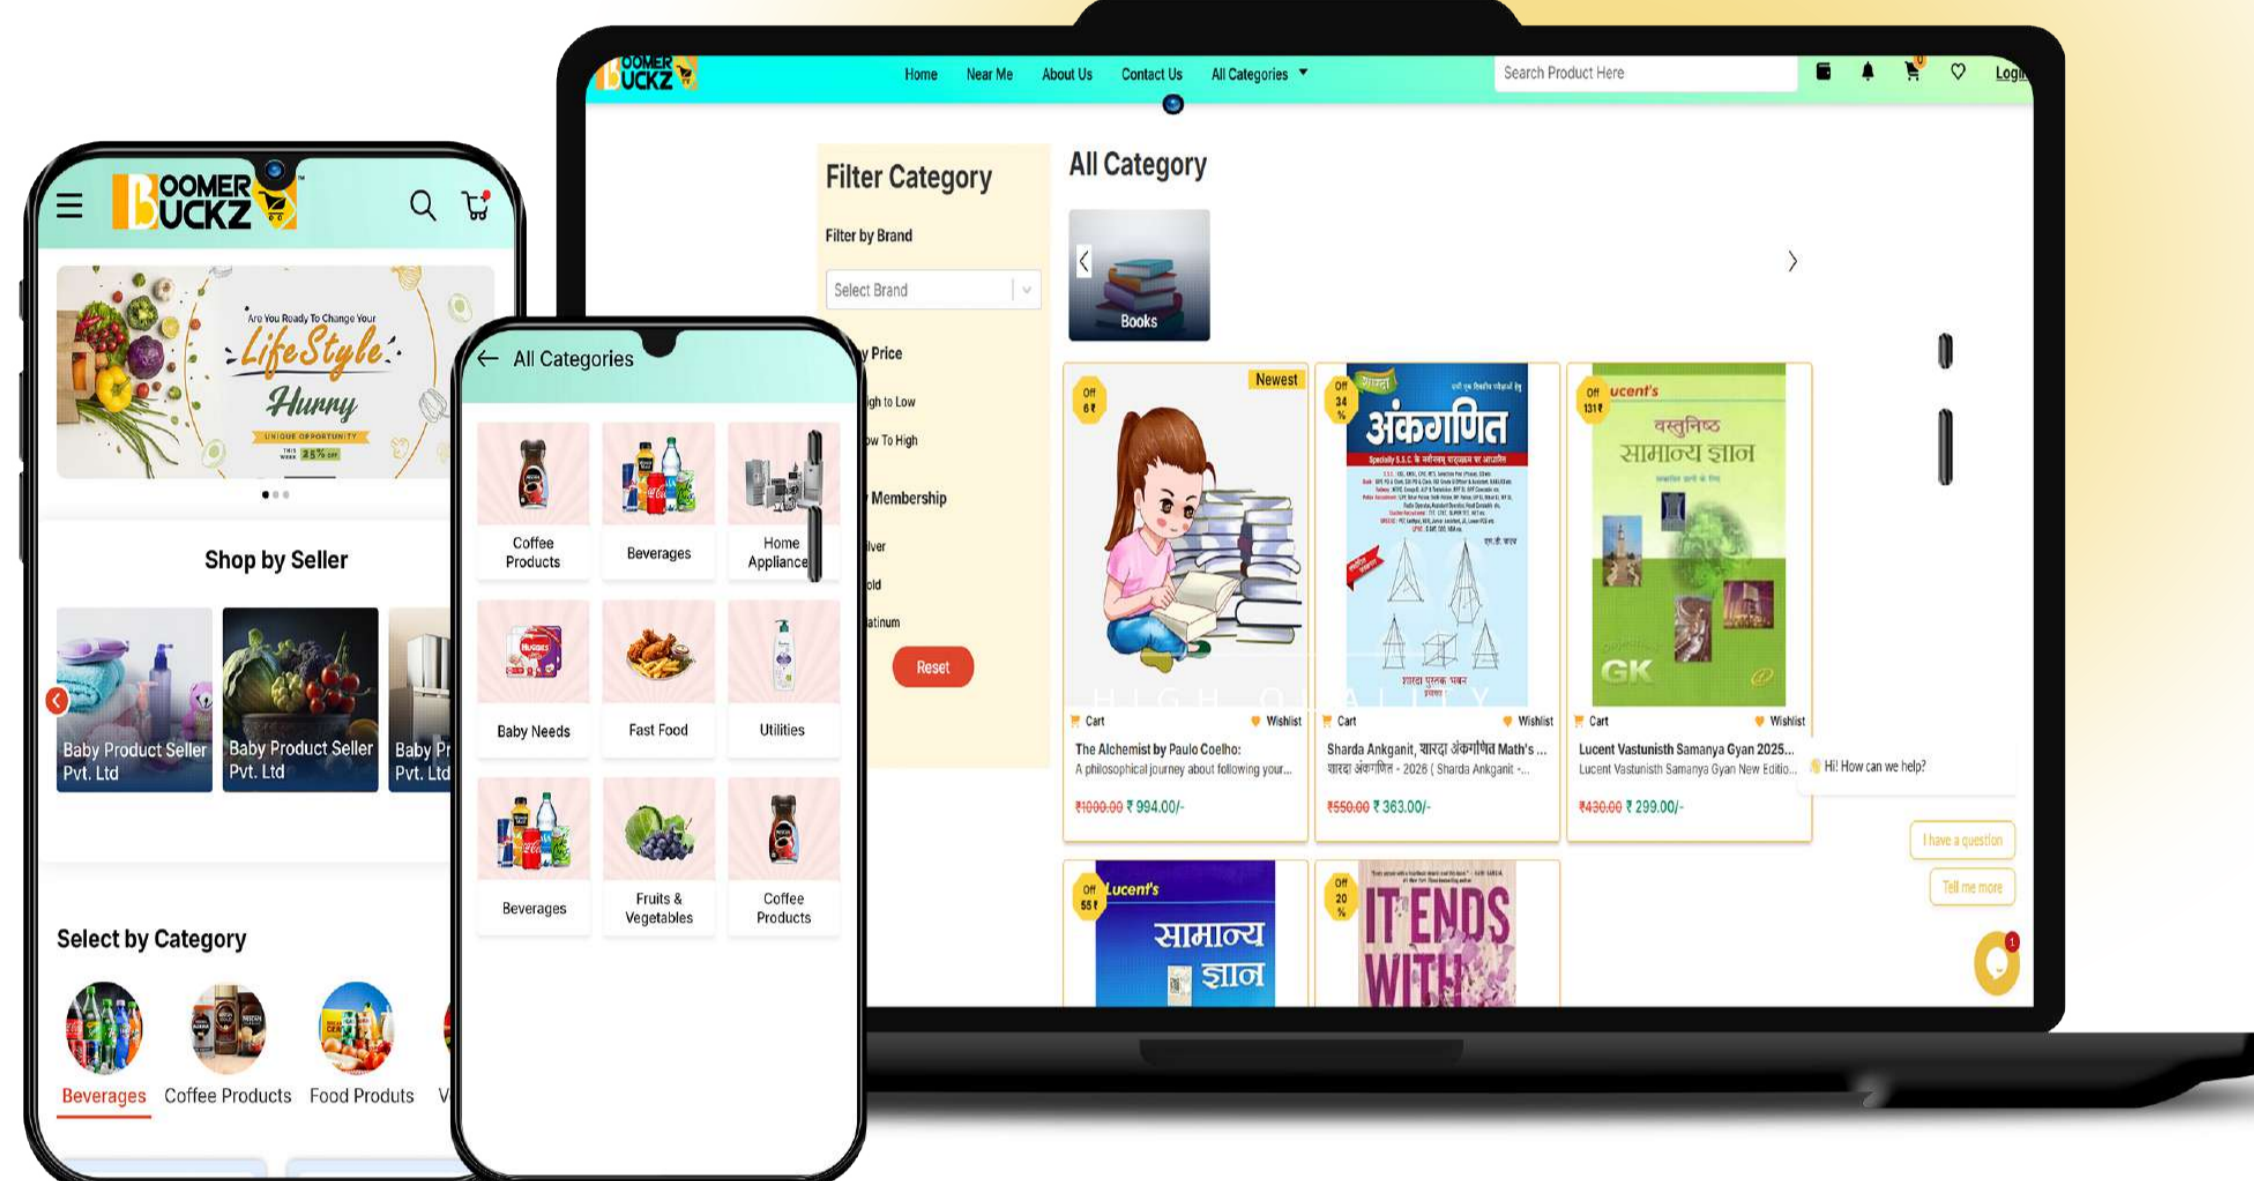

Profcyma Global developed a complete eCommerce ecosystem including a responsive online store, dedicated mobile applications for customers, sellers, and delivery partners, along with centralized admin and seller management panels.

KEY FEATURES

01. Customer Platform

- Browse products across multiple categories
- Secure online shopping experience
- Add to cart and checkout functionality
- Order tracking through the customer mobile app

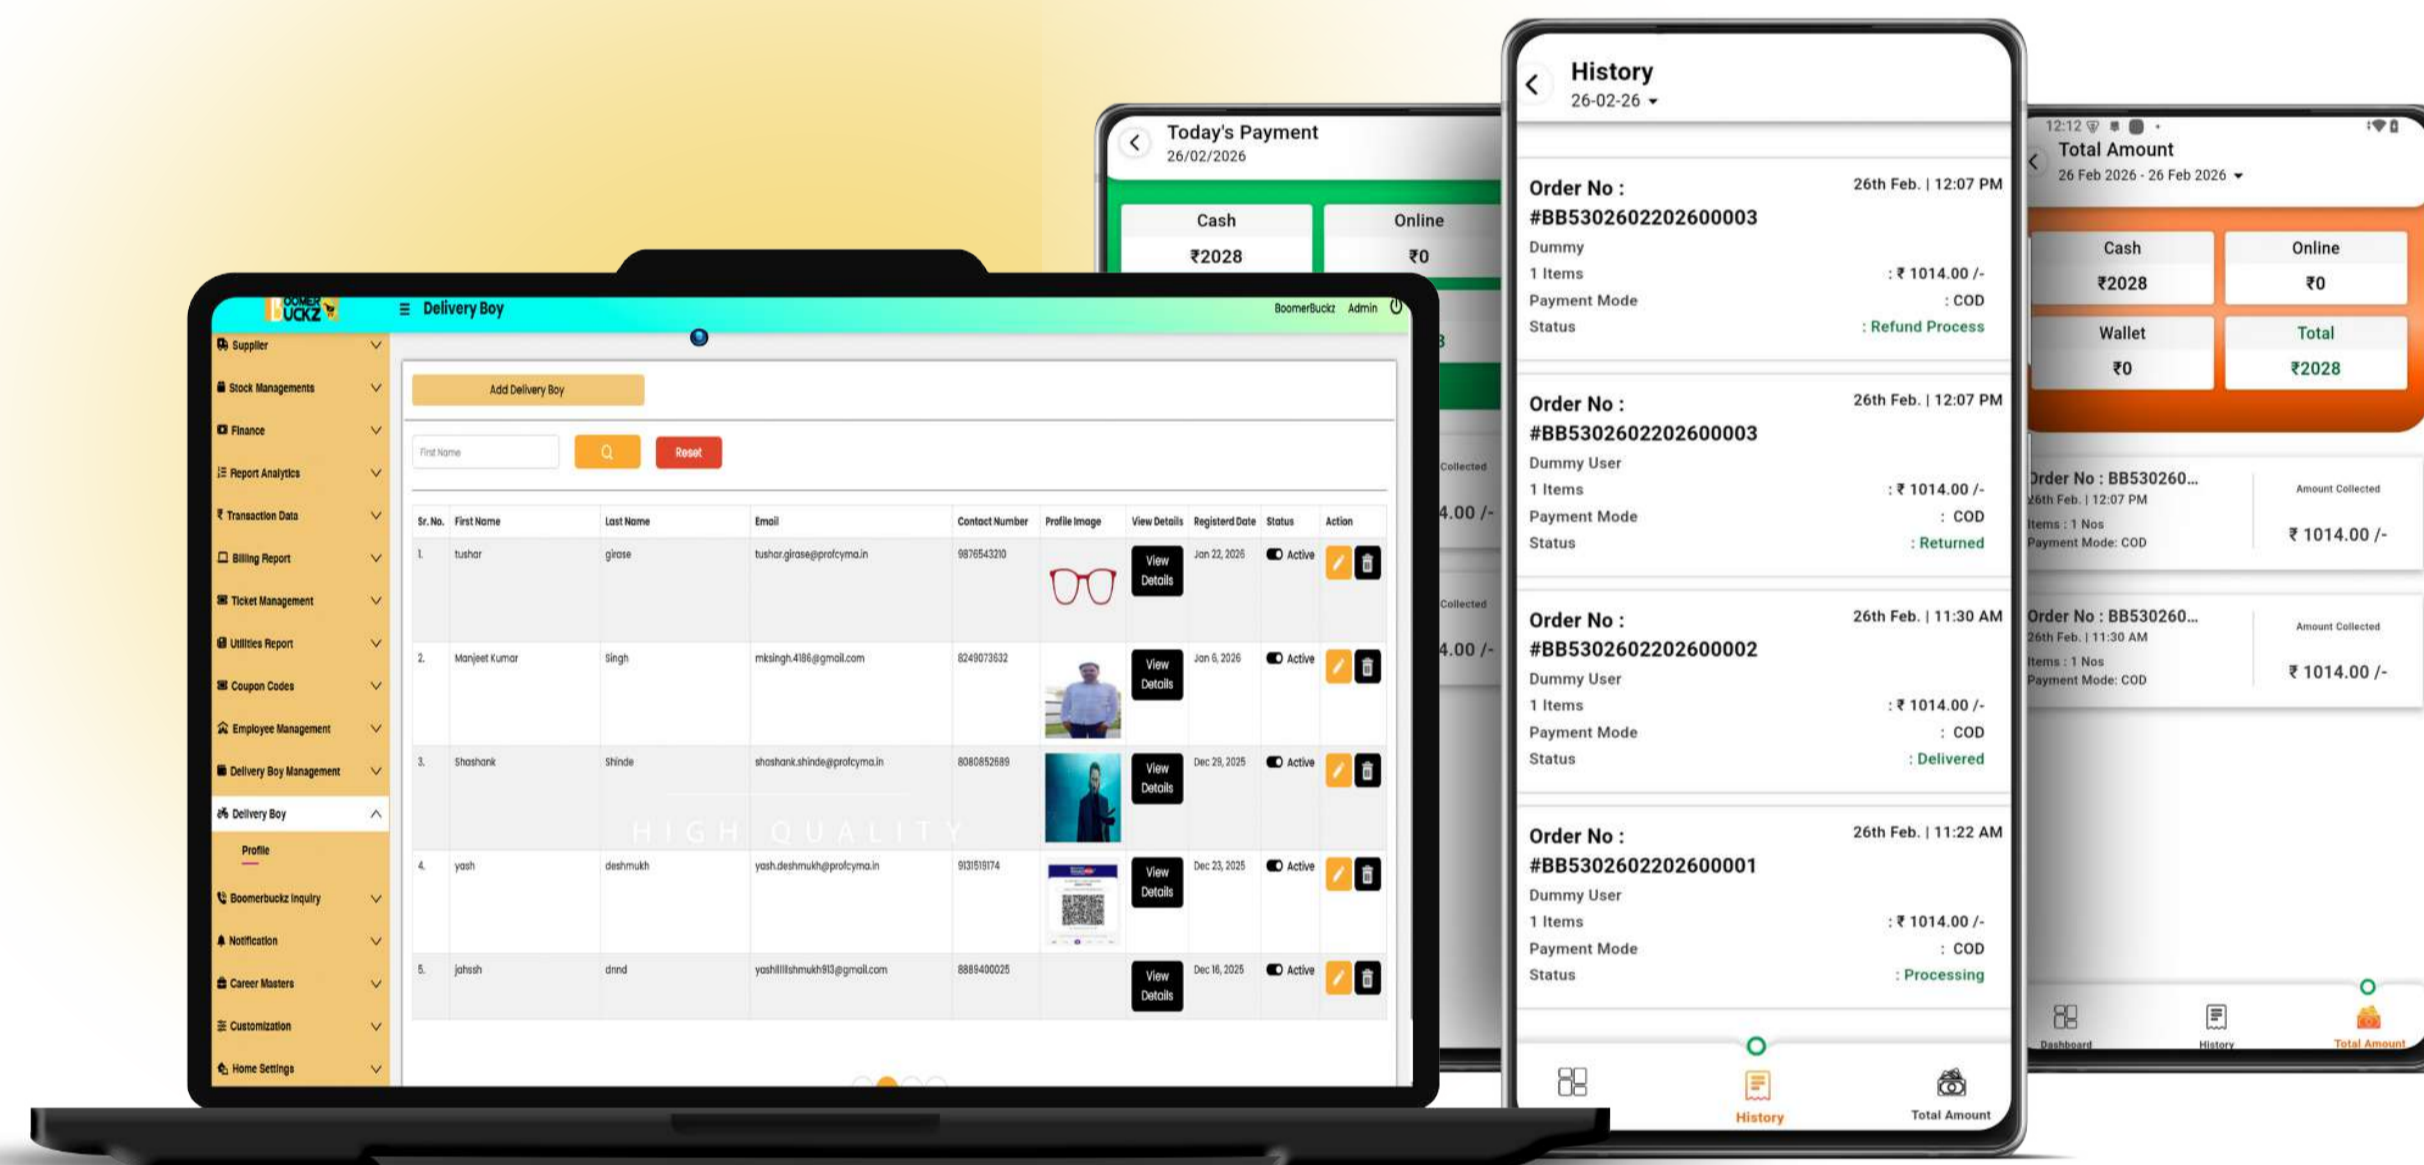

02. Seller System

- Seller mobile application for product management
- Dedicated seller panel for listing & managing products
- Inventory and order management tools

03. Delivery Partner Application

- Delivery partner app for managing assigned orders
- Real-time order updates and delivery status tracking
- Route and delivery management

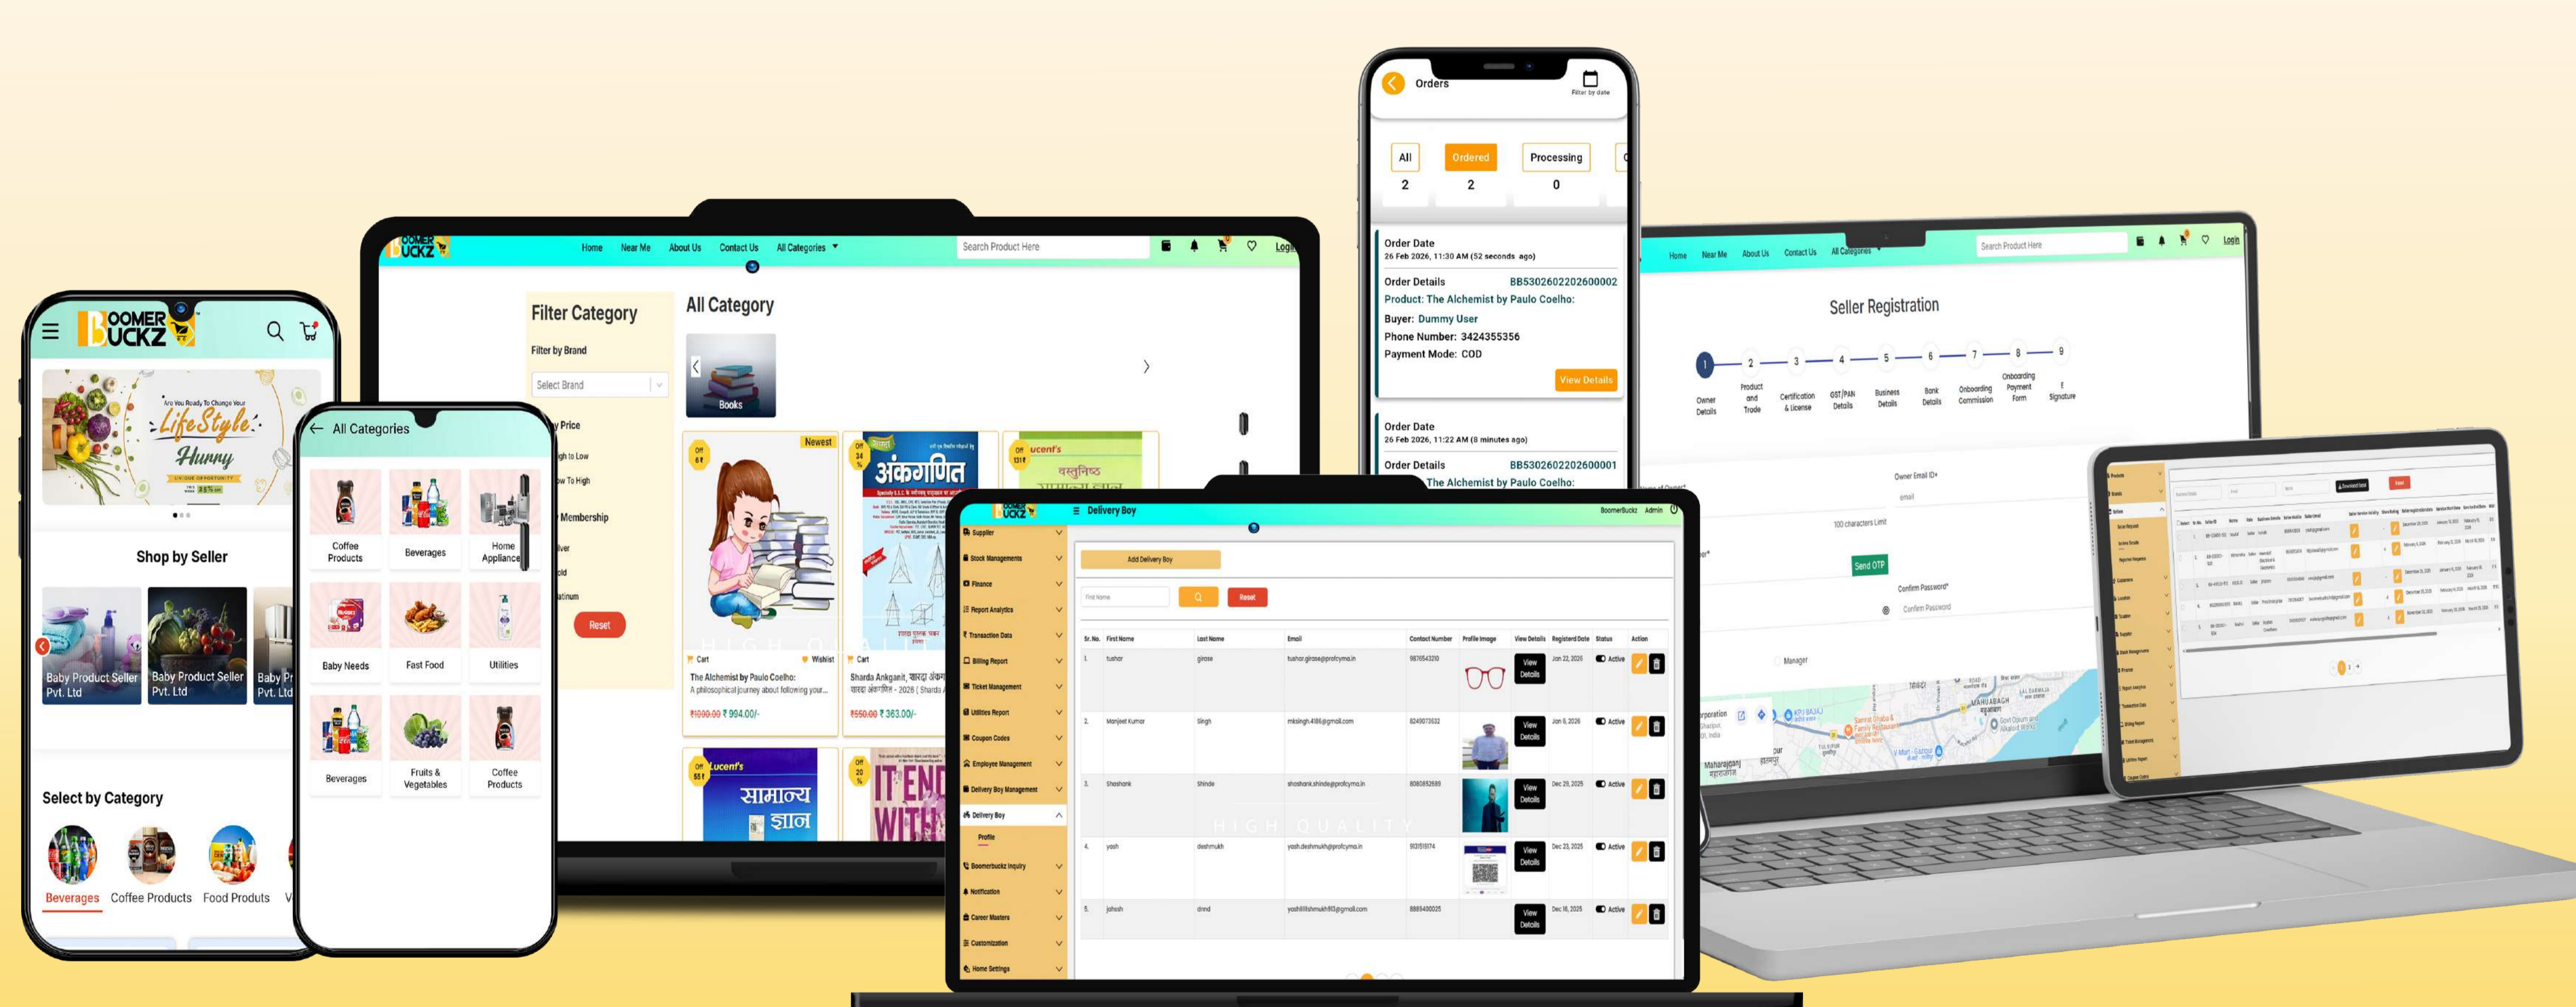

04. Admin Panel

- Centralized platform management
- Control over sellers, products, and orders
- User management & marketplace monitoring

RESULTS & IMPACT

The Boomer Buckz platform created a scalable multi-vendor marketplace that enables sellers to reach a wider customer base while providing customers with a seamless online shopping experience. The integrated mobile applications and centralized management system streamline marketplace operations, order processing, and delivery coordination.

Why This Project Strengthens Profcyma Global's Portfolio

This project demonstrates Profcyma Global's expertise in building full-scale eCommerce ecosystems that connect customers, vendors, & delivery partners through synchronized web and mobile platforms. It highlights our capability to develop scalable digital marketplaces supported by multi-role management systems.
